

# ***Forget-Me-Not so you never forget again!***

## ***What is the Forget-Me-Not?***

Forget-Me-Not is an app on your phone! It's purpose is to help you avoid losing your items by building healthy habits through virtual gardening!

## ***What is a virtual garden?***

The Forget-Me-Not app has a virtual garden! It starts off empty... but when you every time you remember to place an object in its correct place, your garden grows a little!

(what the sticker looks like)

## ***How does my phone know where my objects are?***

By attaching the Forget-Me-Not sticker to any object, modeled off of the Forget-Me-Not flower, it allows your phone to track the items!

## ***What does the sticker do?***

The sticker tells you when an item is not placed in it's normal place, and where the item is! It also tells your phone when your items are in the right place so your garden can grow!

**Forget No More  
Grow your Garden
