

Why you need Fried Phish

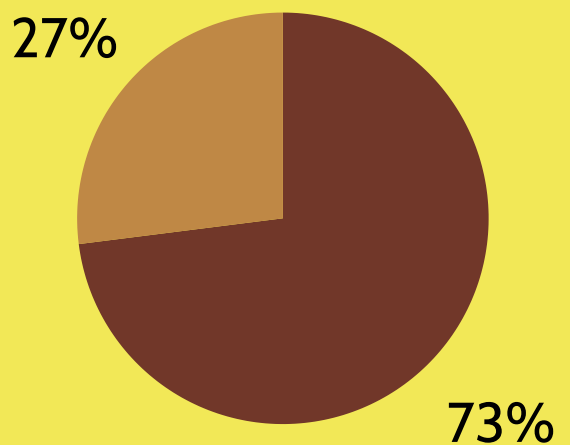

Phishers are dangerous

Everyone is at risk of being a victim to Phishing: Your account, personal info, and important things like access to your bank account or SSN are at risk of being stolen when you fall for a phishing scam.

Anyone can fall for Phishing

According to recent statistics from as recent as 2025, up to 73% of online adults have fallen for an online scam of some sort

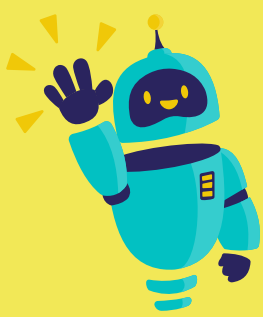

Current services require you to already be skeptical of a scam

Services such as Norton Genie do provide scam detection services, but you have to submit the material you suspect. Scammers prey on the ignorant and unsuspecting

Solution: Advanced AI

Fried Phish solves this problem, its AI program looks at messages send to you and will proactively tell you if it detects a possible scam.

A worry free solution

Fried Phish can protect you from phishing in the moments you can't. Browse with less stress, knowing your online details are a bit safer.
