DormBot
For people with Bad Roommates

DormBot Behavior Settings

1. Free Will Mode:

Decides how much interaction will be necessary for DormBot to function independently on a day-to-day basis.

2. Organization Mode:

This mode decides how organized or chaotic you want your DormBot to be. Ex. How much of a mess Dormbot will leave in its daily activities

3. Cleaning Mode:

Cleaning mode allows the user to scale how well DormBot cleans its personal messes or even the messes you create

4. Roommate Acclimation Mode:

This mode will change DormBot's methods to facilitate your roommate to be an ideal roommate. Ex. Intimidation or Friendly

5. Granted Unilateral Neutralization Mode:

This mode gives the user a self-defense tool made to stun an overly aggressive roommate who shows intentions to destroy or severely damage the DormBot
